## EDUCATION

**Singapore Management University** — Singapore
*B.Sc. Information Systems* — *Aug. 2023 – Expected 2027*

**Singapore Polytechnic** — Singapore
*Diploma in Computer Engineering (networking & cybersecurity)* — *Apr. 2018 – May 2021*

## EXPERIENCE

**VNTT** — Ho Chi Minh City, Vietnam
*AI & IIoT Engineer Intern* — *May – July 2026*

- Built an EdgeX gateway prototype with simulated Modbus TCP, MQTT and Siemens S7 inputs, Python device simulators and TLS publishing to HiveMQ in an 18-container Docker environment.
- Initiated BecaLearn to centralise intern learning materials. Designed the internal-hosting architecture, built the AI-assisted LMS, coordinated UAT and handed over the code and Docker Compose after deployment testing.

**Nepseeds** — Singapore
*Co-Founder & Operations Lead (Part-time)* — *July 2021 – Present*

- Manage Shopify, customer enquiries, international fulfilment and NParks phytosanitary coordination for Nepenthes seeds and occasional live-plant shipments. Implemented order-triggered printing for labels and packing slips.
- Grew the Facebook group organically to approximately 1,500 members through posts and responsive customer communication. Publish Facebook and Instagram content through Meta Business Suite.

**Osiris Technology** — Singapore
*Co-Founder* — *Dec. 2023 – July 2024*

- Built ESP32/DHT22/relay switch boxes, MicroPython firmware, local daily schedules and Wi-Fi/MQTT telemetry through HiveMQ Cloud to AWS S3 for hydroponic lighting and irrigation.
- Recruited the core SMU team and demonstrated remote monitoring and control in early pre-revenue pilots. Presented the BIG grant pitch and demonstrated the solution at World Cities Summit 2024.

**NTUC LearningHub** — Singapore
*Information Technology Executive* — *May – July 2021*

- Automated installation, configuration and domain joining with Windows images and PowerShell, reducing hands-on setup effort from over 45 minutes to under 10 minutes per computer. IT colleagues used the images and scripts.
- Built a Python/MySQL workflow for MAC, IP and NetBIOS asset records, replacing manual entry. Managed Active Directory accounts and provided day-to-day IT support.

**W2 Industrial Services Hub** — Singapore
*IoT Solutions Consultant (Freelance)* — *Mar. – July 2021*

- Set up Azure hosting and integrated SIM-equipped Tastek RTUs, Mosquitto MQTT and a dashboard in a team-built wastewater-sampler system, enabling remote schedule changes and temperature monitoring.
- The platform involved 100+ RTUs and roughly 50 sites during the engagement. It expanded beyond 360 sites after the engagement ended.

## SELECTED PROJECTS

**ESMOS: Multi-Cloud Architecture** | SMU coursework, Jan.–Apr. 2026
Developed the AWS/Azure architecture and Service Design Document. Deployed the stack with the team using Terraform, demonstrated geo-routing and regional failover, and presented service choices and trade-offs.

## SKILLS & LEADERSHIP

**Technical:** Python, MicroPython, PowerShell, TypeScript/JavaScript, SQL, React/Next.js, AWS, Azure, Terraform, Docker/Compose, MQTT, ESP32, Raspberry Pi, Active Directory.

**Delivery:** Requirements gathering, architecture, Service Design Documents, UAT, Figma Make, AI-assisted development.

**Leadership:** Heartware youth volunteer/leader (2023–2025). SP DJ Club Vice President (2018–2020).
