EDUCATION

Singapore Management University

Bachelor of Science in Information Systems (Product Development)

Singapore

Aug. 2023 – Present

Singapore Polytechnic

Diploma in Computer Engineering

Singapore

Apr. 2018 – May 2021

WORK EXPERIENCE

Osiris Technology

Founder

Singapore

Dec. 2023 – July 2024

- Secured SMU BIG grant and incubator placement; built and soldered IoT switch box prototypes (ESP32, DHT22 sensors, relays) to automate hydroponic lighting and irrigation.
- Authored hardware specifications guiding PCB design transition from manual prototypes to production-ready electrical engineering.
- Configured AWS S3 infrastructure for data pipeline and field-tested hardware with 2-3 pre-revenue pilot hydroponic SMEs.
- Represented SMU to showcase solution at World Cities Summit 2024 (SMU IIE booth) to government stakeholders including Ministers Indranee Rajah and Desmond Lee.

NTUC LearningHub

Information Technology Executive

Singapore

May 2021 – July 2021

- Automated new hire workstation provisioning using PowerShell and custom Windows imaging, reducing onboarding time from 45+ minutes to under 10 minutes (5x improvement).
- Created custom Windows boot images (Rufus/Windows Imaging) to standardize new machine deployment across the organization.
- Built Python/MySQL asset tracking system to auto-log machine telemetry (MAC addresses, IP, NetBIOS names) for centralized infrastructure visibility.

W2 Industrial Services Hub Pte Ltd

IoT Solutions Consultant (Hybrid)

Singapore

Mar. 2021 – July 2021

- Architected AWS infrastructure using EC2 and Auto Scaling Groups (ASG) to support 100+ Industrial IoT RTU units for NEA COVID-19 wastewater surveillance across Singapore.
- Developed JavaScript backend integrating Twilio WhatsApp API and Mosquitto MQTT broker to enable real-time equipment alerts from field devices.
- Delivered end-to-end IoT monitoring solution enabling 360-site NEA contract and replacing manual site visits; project infrastructure contributed to the Lee Hsien Loong IDM Smart Nation Award.

Singapore Polytechnic

IoT Engineering Intern

Singapore

Sep. 2020 – Feb. 2021

- Led team of 4 interns to develop cloud-based IoT monitoring dashboard using React, Node.js, and MySQL for 5G autonomous security patrol system.
- Programmed Raspberry Pi firmware using Node-RED and MQTT to capture and transmit real-time telemetry (GPS, battery, temperature, humidity).
- Integrated IoT system with GovTech DECADA secure cloud platform for government data compliance and security standards.

SELECTED PROJECTS

Inno2: Wastewater Monitoring (Straits Times): AWS IoT (EC2, ASG) managing 100+ RTUs. Twilio WhatsApp & MQTT.

5G Autonomous Surveillance Vehicle (Demo): Raspberry Pi telemetry (Node-RED/MQTT). AWS Cloud integration.

TECHNICAL SKILLS

Languages: Python, HTML/CSS, JavaScript, SQL, Bash | **Cloud/IoT:** AWS (EC2, S3, ASG), MQTT, Node-RED, Raspberry Pi, ESP32 | **AI/LLM Tools:** Claude Code, Gemini, ChatGPT
